Young readers will join Agatha as she looks for clues, identifies suspects, and cracks each case! Study the scenes

Find the clues!

Check out the suspects!

LET'S INVESTIGATE!

Look closely inside and outside the museum. Then answer these questions:

- Inside the museum, four dinosaurs have been given a makeover by the prankster. Which are they? The dinosaur figures at the museum's gates show what these dinosaurs are supposed to look like.
- The prankster replaced one dinosaur's head with a fake one. Where did it come from? Look for where a head is missing.
- The prankster used one of the rooms at the museum to set up their practical joke. Which one? They left a piece of a dinosaur in that room.

THE SUSPECTS

Only museum employees have keys to the doors. The blue key opens the door to the wing with the glass roof. The green key opens the door to the gift shop, and the red key opens the door to the lower level. Here's what Agatha found out about each of the suspects:

PICKFORD PIG
CURATOR

Pickford Pig is known for enjoying jokes. Maybe he wanted to pull off a really big practical joke!

LISA LIZARD
CURATOR

Lisa was afraid there wouldn't be many visitors. These pranks have created publicity for her exhibit!

PETER PANDA
CLERK

Peter wanted to do an exhibit on rocks, but the dinosaur theme was chosen instead. He wasn't of all pleased.

LILY LION
RECEPTIONIST

Lily was injured while building one of the dinosaurs in the exhibit! She had joked about getting revenge.

THE WITNESS

MR. TURKEY
MUSEUM PHYSICIAN

"Lisa Lizard is allergic to feathers. Peter Panda is afraid of snakes, and Lily Lion has a broken leg."

Essential facts and compelling information

Quetzalcoatlus

- Period: Late Cretaceous (70 million to 66 million years ago)
- Region: North America
- Maximum size: 39-foot (12-meter) wingspan
- Maximum weight: 441 pounds (200 kilograms)

The Quetzalcoatlus was not a dinosaur, but a type of flying reptile known as a pterosaur. While it was large, it had hollow bones and a small body, which made it light enough to fly. The Quetzalcoatlus had a rigid neck that measured nearly 10 feet (3 meters) in length and a long, toothless jaw. Scientists believe it swooped down to catch fish from the water and walked on the ground to snap up small dinosaurs.
